### Eliminate Redundant Steps

Ps Credit Card works hand in hand with Sage PFW ERP and BatchMasterPFW to process credit card transactions with no rekeying of data.

### Track All Credit Card Details

Ps Credit Card updates Sage PFW sales order invoice or cash receipt entry with all pertinent credit card details such as an authorization number.

### Credit Memo Processing

Ps Credit Card can process full or partial refunds for credit memos generated in Sage PFW.

At Perryman Software,  
we work to help people and businesses  
realize their full potential.

Ps Credit Card works hand in hand with Sage PFW ERP and BatchMasterPFW to process credit card transactions with no rekeying of data. This will save countless hours of repetitive work, especially for companies with high order volume.

Sage PFW users enter credit card information into Sage PFW for payments for sales orders, invoices, or cash receipts. The Ps Credit Card software will then allow you to process those entries with no rekeying of data necessary. You can even override the amounts for partial payments if necessary.

Once the processing has been completed by the Ps Credit Card through the PC Charge Server, Ps Credit Card then updates the Sage PFW sales order, invoice or cash receipt entry with all pertinent credit card details such as an authorization number. If a credit memo is necessary, Ps Credit Card will process the refund as easily as it processes a sale and update Sage PFW in the same way it updates details from a purchase.

From developing innovative solutions to providing award-winning customer support, Perryman Software is dedicated to surpassing your expectations in all aspects of our business.
