

Ps Enhanced Sales Order

For Sage PFW ERP

One Screen Order Entry

Enter, save, and print your sales order header and line item information, all from one screen. Order entry is quick and easy because users do not have to move from screen to screen to enter sales orders.

Seamless Integration to Sage PFW

Ps Enhanced Sales Order immediately updates Sage PFW files. The integrity of your system is therefore maintained because of this real-time update.

Ship Inventory Items without Invoicing

The module separates the shipping and invoicing functions. As such it is now possible for inventory quantities to be down-counted before the order is actually invoiced. This immediate update of the inventory quantities gives credibility to the inventory quantities on hand. The order can then be invoiced at a time convenient to the accounting department.

Compatibility

Ps Service & Repair is compatible with Sage PFW V5.4+

SAGE PFW

At Perryman Software, we work to help people and businesses to realize their full potential.

Success of the distribution arm of your business is heavily dependent on the ability of your order takers to quickly and accurately take the customers' orders. Ps Enhanced Sales Order from Perryman Software provides a quick and easy way to enter orders accurately on one screen. In addition, it augments the already robust Sage PFW sales order module with functionalities such as: Split Commissions, Batch Shipping capabilities, and separation of shipping and invoicing functions.

With user-definable sales order functionality, Ps Enhanced Sales Order allows you to enter discounts, automatically process credit card orders, use the vendor key for inventory items, split commissions between salespeople, and print, email, or FAX quotes and order confirmations.

Ps Enhanced Sales Order lets you increase the efficiency of your distribution center and reap the benefits.

From developing innovative solutions to providing award-winning customer support, Perryman Software is dedicated to surpassing your expectations in all aspects of our business. For more information about Perryman Software applications, contact your local Sage business partner, call us directly at 800-551-6875, or visit our website at www.perryman-sw.com.

Features

Ps Enhanced Sales Order for Sage PFW ERP

Split Commissions Between Multiple Salespersons

The commissions earned from a particular sale can be split between several sales persons on the Sales Order or on the Invoice. A customized Commission Report outlines the details of these commissions over a specified time period.

Batch Processing For Shipping and Printing Invoices

The shipping of inventory items is done in batches. This gives the additional functionality of allowing multiple users to ship inventory items from multiple inventory locations simultaneously. Batch processing is also available when processing invoices.

Credit Card Processing From Order Entry

This feature allows Sales Representatives to process CC from the OE and automatically updates the order with amounts and authorization numbers.

Automatically Create Purchase Orders From Sales Order Line Items

How about creating a Purchase Order for a sales order line item that you do not have in stock? The module allows you to automatically create a PO for a sales order line item without exiting the application.

Powerful Price Discount Features

In addition to entering a discount for each line item, you now have the added capability to calculate and record a discount for the entire order. You will also be able to group multiple line items by line or by inventory classes to arrive at a quantity discount.

Print, Email, or Fax your Quotes and Order Confirmation

While entering a sales order, you can now at the click of a button, print, email or fax the quote or order confirmation to your customer without exiting the application. Print these forms directly to any printer in your network.

Lookup Inventory Items With The Vendor Item Key

Worry no more about keeping manual records for the vendor or customer item keys. The module allows you to lookup your inventory item from the vendor or customer item key.

Easily View Customer Profile On-Line

Click a button and view all invoices, credit memos, payments and current orders for the customer on the sales order. You will have no need to print additional reports as all the information you need to process the order is at your finger tips.

Increase Efficiency with User-Definable Sales Order Settings

Ps Enhanced Sales Order provides over 20 user-definable Order Entry functionalities. By defining default inventory locations, line item types and other order entry defaults by user, you increase the speed, accuracy and efficiency of your order takers.
