

FORMULATOR CONNECTOR FOR SAGE 100

Perryman's Formulator Connector for Sage 100 allows you to integrate Sage 100 to Formulator SQL version. Using either ProvideX or SQL our connector can transfer data quickly and seamlessly. Whether you want to do it on demand or have it scheduled, it doesn't matter.

Integration Points:

- Moves PO on Order quantiles from Sage 100 to Formulator for MRP calculations
- Moves PO inventory receipts quantities from Sage 100 to Formulator
- Moves Production Batch and Fill Tickets completed to Sage 100 MFG ready to post
- Moves no PO and SO inventory transactions to Formulator for inventory balancing
- Moves SO committed to sales from Sage 100 to Formulator for MRP calculations
- Moves SO shipped quantiles from Sage 100 to Formulator
